MUKESH SINGH RAJPUT

QA Director / Head of QA

msr5464@gmail.com | +91 **9540845464**

linkedin.com/in/mukesh-rajput | https://github.com/msr5464

OVERVIEW

- Having **14 years** of experience in the Software Testing Industry, with a strong focus on the **Fintech** & **SaaS** domain in multiple Southeast Asia countries (📌 My **Portfolio** Link: https://msr5464.github.io)
- Currently **managing a team of 45+ QAs** (previously **120+**) across various countries such as SG, VN, ID, and IN. The team focuses on Manual, Automation, and Performance testing in the **Fintech** & **Banking** domain.
- **AI Productivity:** Created **AI Test Studio** + **QA Agent Network** (open-sourced) - 5 Claude-powered QA agents in daily QA workflows, boosting productivity in test case design, bug reviews, automation analysis, automation script writing, and PR reviews; and a RAG-based **In-house Knowledge AI platform** using Ollama & LangChain;
- **AI Evaluation & Testing**: checks LLM, RAG and agent outputs for accuracy, hallucinations and safety before release by using RAGAS (similar to DeepEval); golden datasets, LLM-as-judge, CI quality gates
- **Technical Leadership:** Created multiple **Web Automation, Mobile Automation & Api automation** frameworks from scratch using Selenium, Java, RestAssured, Appium & TestNG, with proper CI/CD as QA Architect
- **Team Management:** Created the whole team from **scratch,** now responsible for mentoring, development, and career management, like performance reviews, managing low performers, promotions, appraisals, and hirings.
- **Release & Jira Management**: Ensuring on-time product releases by coordinating thorough manual and automated testing to maintain high quality and minimise production bugs.
- **OKRs & Data-Driven Mindset:** Encouraged the use of **data** for all key decisions within the team. Converted insights into measurable **OKRs** to track progress and drive **accountability**.
- Lastly, created the **Quality Dashboard** (PHP, HTML, JS) for tracking overall quality metrics of the team, like automation execution, test coverage, production bugs, SLA, etc (also open-sourced)

TECHNICAL SKILLS

AI Engineering	AI Agents, Multi-Agent Systems, RAG, Claude, Playwright MCP, OpenAI, Ollama, LangChain, ChromaDB, Prompt Engineering, RAGAS, LLM-as-judge, RAG & Agent AI Evaluation
AI Productivity	Claude, Cursor, AntiGravity, Onyx, GitHub Copilot, ChatGPT, Gemini
Languages	Java, Python, PHP, JS, C
Automation	Selenium, Playwright, Appium, RestAssured, TestNG, JMeter; Maven, Gradle, Jenkins
Others	In-house Knowledge AI, QA Dashboard, TestRail, BrowserStack, ReportPortal, Jira

Award & Certifications:

- **Top performer of the year** — 2-time award winner
- **Oracle** — JAVA SE 6 Certification

WORK EXPERIENCE

QA Director / Aspire

Dec 2022 – NOW | Gurgaon

Aspire is a leading Singapore-based B2B FinTech company offering a cloud-native **business banking and financial operations platform** that provides multi-currency business accounts, **corporate cards, cross-border payments**, spend management, accounts payable and receivable automation, FX, and treasury solutions for over 50,000 businesses across Southeast Asia.

- ➔ Managing a **45+ member QA team** across SG, VN, ID, and IN, covering Manual, Automation, and Performance testing.
- ➔ Built an **AI-driven QA culture** by creating **AI Test Studio** + **QA Agent Network** (open-sourced) - 5 AI Agents using **Claude, RAG, and LangChain** to automate the end-to-end QA lifecycle → from converting requirements and plain-English test scenarios into automation code, to classifying daily test failures into Product Bugs vs Automation Issues (83% accuracy), self-healing broken locators, and adapting tests when the product changes.
- ➔ **AI evaluation layer:** Built accuracy benchmark with known correct answers, LLM-as-judge, safety-rule checks on every run, and a dashboard tracking success rate, LLM calls, tokens and cost per agent
- ➔ Built a scalable **In-house RAG Knowledge AI platform** (now open source) with multi-format document intelligence, hybrid retrieval, GPT-4/Ollama support using Flask, LangChain, and ChromaDB
- ➔ Reduced production issues by **72%** within 2 quarters by introducing regression testing cycles and improving development processes.
- ➔ Replaced the existing automation framework, **reducing execution time from 10 hours to 1 hour**.
- ➔ Set up a **QA Dashboard** to track key quality metrics like production bugs, automation coverage, stability, and SLA compliance.
- ➔ Designed a **QA Growth Framework** defining roles, responsibilities, & structured career progression paths. And then restructured the team by focusing on **high performers**, exiting underperformers, and hiring A+ players.
- ➔ Introduced **OKRs** focused on **production bug management and SLA** adherence, establishing a monthly review cadence at both vertical and organisational levels.
- ➔ **Security & Compliance Testing:** Experience in security testing, including authentication & authorisation workflows, OWASP Top 10 validation, 2FA, passkeys, etc., and compliance testing for PCI-DSS and GDPR.

Head of QA / Gojek

Jun 2018 – Nov 2022 | Jakarta

Gojek is Southeast Asia's first decacorn and a Super App offering food delivery, payments, transport, and more, with the **Payments division** focused on **online & offline payment solutions** and merchant operations across **Indonesia**.

- ➔ **Managed a team of 40+ QAs,** which includes both Manual, Automation & Performance in the Payment domain (Payment Gateway B2B - Online & Offline)
- ➔ **Spearheaded e2e team management**, including mentorship, performance reviews, upskilling, career development, handling low performers, promotions, and recruitment.
- ➔ **Transitioned into Gojek** post-acquisition of **Midtrans**; contributed to the formation of the **Merchant division** by integrating QA functions across Midtrans, Kartuku, NadiPos, and Mapan
- ➔ **Standardised QA processes** and Automation frameworks across multiple acquired companies, ensuring consistent quality.
- ➔ **Upgraded team capabilities** by training manual testers from acquired companies in automation, significantly enhancing the **technical depth** of QA across the org.

- ➔ Independently developed a **Quality-Dashboard** (already open-sourced), to track key quality metrics such as automation execution, test coverage, bug leakage, code coverage, and more.

- ➔ **Established a Centralised QA Function**, indirectly overseeing QA for **120+ QAs across 10+ product verticals**. Introduced a **unified QA strategy** with harmonised frameworks, tools, and best practices, reducing redundancies and improving collaboration across verticals.

Head of QA / Midtrans

Jun 2017 – May 2018 | Jakarta

Midtrans is a leading **payment gateway in Indonesia**, offering secure and scalable payment solutions across 25+ methods, including cards, e-wallets, and bank transfers. It is now part of Gojek.

- ➔ **Joined as first QA** in Midtrans, introduced structured QA processes and best practices across Engineering.

- ➔ **Hired** multiple people in IN & ID and created a full **QA team from scratch**; introduced proper QA processes and procedures to improve the overall quality of the product.

- ➔ **Created Web and API automation framework from scratch** which is now consumed by the whole engineering team by using Selenium, RestAssured, TestNG and JAVA

- ➔ **Established the India office** from scratch to scale QA hiring, growing the team to 7 members within a year.

- ➔ Extensively proficient in **Functional testing**, Integration testing, GUI testing, and Regression testing on all platforms like Web, Mobile web, Mobile Applications etc.

- ➔ Developed **end-to-end automation scripts** covering critical product workflows, with integrated database validation through SQL queries to ensure functional and data-level accuracy.

Principal SDET / PayU

Jul 2013 – Jun 2017 | Gurgaon

PayU is a leading **Fintech** and **digital payments** company in India, backed by Prosus. It empowers over 450,000 businesses with secure and scalable online payment solutions across cards, UPI, wallets, and more.

- ➔ Grew from QA Engineer to **Principal SDET** within four years by learning & driving automation initiatives across multiple products.

- ➔ Built and scaled **Web, API, Mobile, and UI automation frameworks** from scratch using Selenium, Appium, and RestAssured.

- ➔ Integrated automation into CI/CD pipelines, enabling automation for critical payment transaction flows, strengthening platform reliability.

- ➔ Led **pixel-perfect UI automation** using Sikuli and custom image verification libraries. Integrated **TestRail**, **RestAssured**, and image comparison tools into CI/CD pipelines for efficient execution.

- ➔ Prepared detailed **acceptance & functional test cases** based on business requirements; performed Functional, Integration, and System testing to validate overall application stability and adherence to requirements

EDUCATION

GATE (IIT)	*2012 – 2013	IIT - B*
B.Tech (IT)	*2009 – 2013	UPTU*
Intermediate	*2007 – 2008	CBSE*
High School	*2005 – 2006	CBSE*
